Atmospheric Diffusion (Ellis Horwood Series in ...

"Atmospheric Diffusion" is an advanced text book. As with most books on atmospheric diffusion, Pasquill's and Smith's book is heavy in statistical math. Unlike many such books, it is also well illustrated and includes many empirical examples (e.g., K rates for different terrains, methods for determining stability, etc.).

Atmospheric dispersion modeling is the mathematical simulation of how air pollutants disperse in the ambient atmosphere. It is performed with computer programs that include algorithms to solve the mathematical equations that govern the pollutant dispersion. The dispersion models are used to estimate the downwind ambient concentration of air pollutants or toxins emitted from sources such as industrial plants, vehicular traffic or accidental chemical releases. They can also be used to predict futu
