Engineers use a simple equation to calculate the bearing pressure that a foundation exerts on the soil beneath it; bearing pressure is $q = \text{force} \div \text{area}$. (For simplicity, we are ignoring the weight of the footing and the effects of the groundwater table.) Bearing pressure is defined as q in this equation.

A Good Foundation - Lesson - TeachEngineering

In engineering, a foundation is the element of a structure which connects it to the ground, and transfers loads from the structure to the ground. Foundations are generally considered either shallow or deep. Foundation engineering is the application of soil mechanics and rock mechanics (Geotechnical engineering) in the design of foundation elements of structures.

In order to build relationships with people different from yourself, you have to make a concerted effort to do so. There are societal forces that serve to separate us from each other. People from different economic groups, religions, ethnic groups, and races are often isolated from each other in schools, jobs, and neighborhoods.

Section 2. Building Relationships with People from ...

Build strong relationships through trust. When an issue arises and hasn't been resolved, always fill the gap with trust—assume the best about the other person's motives. Establish these principles into the foundation of your children's Sunday school ministry and it'll stand tall and straight and impact kids and families for eternity.
