CHAPTER 13 SECTION 2 The Ocean Floor - queenwhitley.com

Geologists classify the magma from quiet eruptions by the shapes it forms when it cools. The table on the next page shows a few of these shapes. SECTION2 Volcanic Eruptions. CHAPTER 13 Volcanoes. Type of Magma Composition Color Where It Is Commonly Found Mafic high in

magnesium and iron generally dark oceanic crust.

CHAPTER Volcanoes SECTION 2 Volcanic Eruptions

Recall from Chapter 2 that magma is molten, liquid rock material found underground and forms igneous rocks. Magma rises up to Earth's surface because its density is less than the rock through which it moves. When magma rises to Earth's surface it is called lava. Volcanoes can cause the eruption of liquid, gas, or solid materials.
