into the meanings of the English modal auxiliary verbs, using data provided by a computer corpus of approximately 2,000,000 words of modern English printed texts. This corpus consists of two sub-corpuses: the 1,000,000 word Brown University corpus of American English, and a matching Lancaster University corpus of British English. 2. Descriptive Aims

DOCUMENT, RESUME - ERIC

The diachronic study of Philippine English (PhIE) has recently become possible through the compilation of a PhIE corpus (Phil-Brown) at De La Salle University. The period of time defined by Phil-Brown (whose sampling period was the late 1950s to the early 1960s) and ICE-Phil, the Philippines component of the International Corpus of English (comprising texts sampled in the early 1990s), covers most of the period of time over which there has been general recognition of the existence of PhIE ...
