### What Are Fronds For A

A frond is a large, divided leaf. In both common usage and botanical nomenclature, the leaves of ferns are referred to as fronds and some botanists restrict the term to this group. Other botanists allow the term frond to also apply to the large leaves of cycads, as well as palms and various other flowering plants, such as mimosa or sumac. "Frond" is commonly used to identify a large, compound leaf, but if the term is used botanically to refer to the leaves of ferns and algae it may be applied to

The term "frond" is used in several different ways. Most commonly, when someone talks about a frond, he or she means a pinnately compound leaf or leaf-like structure on a plant, such as the fronds of a palm tree. This usage reflects the Latin root of the word, as "frond" is derived from the word for "leaf" or "foliage."
